DR. DAVID JENSEN
Superintendent

April 10, 2013

To Whom It May Concern:

Please accept this letter of support in behalf of Monsey Construction Consulting Service as they pursue project management opportunities in the state of Wyoming. Monsey Construction Consulting Service is overseen by an individuals in whom I have a tremendous amount of respect; Kevin Monsey. Kevin has been instrumental in the successful completion of ongoing bond projects occurring in Humboldt County School District since 2008. My interaction with Kevin has been in my capacity as Superintendent, with direct oversight responsibility for Capital Improvements Projects.

After securing the support of our community through the passage of a bond initiative, we found ourselves with the responsibility to follow through and complete the tasks which were presented to the voting public. It became evident that we would require the resources of individuals who were familiar with all aspects of the bond process including bidding and oversight requirements associated with such an endeavor. After a careful and thorough RFQ and RFP process, the Board of Trustees selected the experience provided by Kevin and his associate, Mike Mitchell, of Mike Mitchell Management. The work provided by these two individuals has been outstanding and has been widely acknowledged throughout our community.

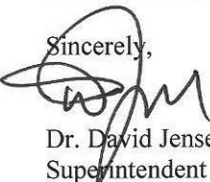

Upon selection, these two individuals began to aggressively act in behalf of Humboldt County School District. During the first year, timelines were short, with the intent of the district that the bulk of the projects be completed during a three month period during the summer of 2009. Not only were timelines tight, but they were also broad in that all 11 schools in the district were expected to receive some level of upgrade. Both Kevin and Mike demonstrated their skill and expertise in their ability to manage and oversee a variety of projects, project managers and various document requirements all of which occurred concurrently. This same dedication and work ethic has been demonstrated annually. Working in a school setting, projects must be completed during a the short window of summer vacation.

Throughout this process both Kevin and Mike were visible and informative. Kevin meets frequently with an established Bond Oversight Committee, comprised of district and community members. In addition, Kevin frequently attends board meetings to provide updates to the Trustees, as well as meeting with individual site personnel to discuss specific projects that were scheduled. Their ability to interact with a variety of publics was highlighted as a key component for community transparency and support.

Perhaps the most compelling statement on the expertise of the Monsey Construction Consulting Service, and in particular Kevin Monsey, is his ability to accurately project expenses and to consistently come in under budget. As a result of their efforts, the district has available additional funds in support of capital improvement projects scheduled on an annual basis. It is the districts anticipation that Kevin and Mike will continue in their capacity of projects management for our upcoming projects for many years to come.

It is without hesitation that I can refer the Monsey Construction Consulting Service to any Wyoming agency as you consider selecting a projects management service. I am confident that you will find the same level of ability and service that Humboldt County has received. I would encourage you to contact me if I can provide any additional information regarding the services provided to Humboldt County School District.

Sincerely,

Dr. David Jensen
Superintendent
